India

Hello,

I am Hardik Joshi and I am a pre-final year student at Maharaja Surajmal Institute of Technology, New Delhi. I have been developing websites and applications since the start of my university education. Most of my experience lies in full stack development, data science, machine learning and python development.

While doing all the technical stuff, I am have always been deeply interested in the field of banking, business and investment and as an avid reader, I just love to read books regarding these fields.

You will find high level summaries of my job duties/education history in my resume. If you want to see some of the projects that I work on in my spare time, see my GitHub profile: www.github.com/hjhardik and my portfolio site: www.hjhardik.me (recommendations, some portfolio items and more).

I genuinely hope that I can join your team and become an integral part of it.
Thank you for your time and consideration. I really look forward to speaking with you about this opportunity.

Sincerely,

Hardik Joshi
